Contents Volume 150

1 Editorial: OR applied to health services: Planning for the future with scarce resources
M.S. Rauner and J.M.H. Vissers
3 How many AEDs in which region? An economic decision model for the Austrian Red Cross
M.S. Rauner and N. Bajmoczy
19 Towards incorporating human behaviour in models of health care systems: An approach using discrete event simulation
S. Brailsford and B. Schmidt
32 Prioritising waiting lists: How and why?
P.M. Mullen
46 How likely is it that a run of poor outcomes is unlikely?
S. Gallivan
53 The evaluation of disease prevention and treatment using simulation models
R. Davies, P. Roderick and J. Raftery
67 Priorities and allocation of health care resources in developing countries: A case-study from the Mtwara region, Tanzania
S. Flessa
81 A systems modelling approach for the prevention and treatment of diabetic retinopathy
P.R. Harper, M.G. Sayyad, V. de Senna, A.K. Shahani, C.S. Yajnik and K.M. Shelgikar
92 Estimating bed requirements for an intermediate care facility
M. Utley, S. Gallivan, K. Davis, P. Daniel, P. Reeves and J. Worrall
101 Integrating simulation and optimisation in health care centre management
V. De Angelis, G. Felici and P. Impelluso
115 Local search with annealing-like restarts to solve the VRPTW
H. Li and A. Lim
128 The design of reverse distribution networks: Models and solution procedures
V. Jayaraman, R.A. Patterson and E. Rolland
150 Neighborhood search heuristics for the uncapacitated facility location problem
D. Ghosh
163 Approximate solutions for a stochastic lot-sizing problem with partial customer-order information
N.P. Dellaert and M.T. Melo
181 Local optimization of observed points with no need to observations
Y.-z. Hong
194 A method for choosing from among alternative transportation projects
P. Ferrari
204 Incorporating wealth information into a multiple criteria decision making model
E.K. Karasakal and W. Michalowski
220 The pairwise egalitarian solution
J. Sánchez-Soriano

doi:10.1016/S0377-2217(03)00327-8

233 Oleg I. Larichev in Memoriam
E. Brouk, E. Furems, A. Lotov and A.B. Petrovsky
237 Distributed decision making—a unified approach
C. Schneeweiss
253 Multicriteria heuristic search
L. Mandow and J.L. Pérez de la Cruz
281 Parametric on-line algorithms for packing rectangles and boxes
F.K. Miyazawa and Y. Wakabayashi
293 The analysis of optimal control model in matching problem between manufacturing and marketing
M.-S. Chen and M.-C. Chu
304 Offsetting inventory cycles of items sharing storage
N.N. Murthy, W.C. Benton and P.A. Rubin
320 Fuzzy inventory with backorder for fuzzy order quantity and fuzzy shortage quantity
K. Wu and J.-S. Yao
353 Learning by doing in a *T*-period production planning: Analytical solution
F. Alvarez and E. Cerda
370 Optimization of multi-feeder (depot) printed circuit board manufacturing with error guarantees
B. Kazaz and K. Altınkemer
395 Retail promotions with negative brand image effects: Is cooperation possible?
S. Jørgensen, S. Taboubi and G. Zaccour
406 Optimal allocation of multi-state elements in linear consecutively connected systems with vulnerable nodes
G. Levitin
420 A two-stage decision procedure for monitoring processes with low fraction nonconforming
L.Y. Chan, C.D. Lai, M. Xie and T.N. Goh
437 A metamodeling methodology involving both qualitative and quantitative input factors
S. Tunali and I. Batmaz
451 Sequential condition-based maintenance scheduling for a deteriorating system
L. Dieulle, C. Bérenguer, A. Grall and M. Roussignol

463 Editorial: Financial modelling and extreme events
A. Rai and N. van der Wijst
466 The efficiency effects of a single market for financial services in Europe
A.N. Berger
482 Comparative performance evaluation under uncertainty
J. Spronk and E.M. Vermeulen
496 Multiple criteria decision making combined with finance: A categorized bibliographic study
R.E. Steuer and P. Na
516 Value at risk calculation through ARCH factor methodology: Proposal and comparative analysis
J.D. Cabedo Semper and I. Moya Clemente
529 The practice of Delta–Gamma VaR: Implementing the quadratic portfolio model
G. Castellacci and M.J. Siclari
546 Simulated annealing for complex portfolio selection problems
Y. Crama and M. Schyns
572 The optimal portfolio problem with coherent risk measure constraints
S. Benati
585 Network simplex algorithm for the general equal flow problem
H.I. Calvete

601 Models for a fuzzy inventory of two replaceable merchandises without backorder based on the signed distance of fuzzy sets
J.-S. Yao, L.-Y. Ouyang and H.-C. Chang
617 Strategic commitment to price to stimulate downstream innovation in a supply chain
S.M. Gilbert and V. Cvsa
640 Multiobjective programming methods in the reserve selection problem
D.P. Memtsas
653 Product line selection and pricing under a share-of-surplus choice model
U.G. Kraus and C.A. Yano
672 A model and solution method for multi-period sales promotion design
S.K. Nair and P. Tarasewich
688 Contents Volume 150
